Please insert a period (.) at the end of claim 11.

double patenting. Applicant has filed a terminal disclaimer, which overcomes the double patenting rejection.

5. Thus, regarding independent claim 1, the prior art of record neither shows or suggests a bottom-emitting OLED device comprising, in addition to other limitations of the claim, a plurality of hole-injecting layers including a bilayer structure having a layer including an oxide and a layer including a fluorinated carbon.

6. The subject plurality of hole-injecting layers described above is provided for reducing drive voltages and improving the efficiency of the OLED device. Due to their dependency upon independent claim 1, claims 2-22 are also allowable. The design is new and unique to the art.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
